

BAKER COLLEGE
STUDENT LEARNING OUTCOMES

NUR4452 Community Health Nursing for the
Experienced Nurse Clinical
3 Semester Hours

Student Learning Outcomes and Enabling Objectives

1. Apply strategies for assessment, planning, intervention, and evaluation that are appropriate to individual, family, and population sub-groups with respect to major legal, social, cultural, political, and economic issues relevant to the delivery of community based nursing care
 - a. Provide comprehensive assessment data to support nursing diagnoses, including epidemiological, environmental, and community resources
 - b. Apply evidence-based research as a foundation for planning nursing interventions for culturally diverse individuals, families, groups, or communities
 2. Investigate community resources and services that promote the health of the individual, family, and population sub-groups
 - a. Explore community health resources within the community in which you practice nursing.
 3. Use clinical judgment and decision making skills in appropriate, timely nursing care during disaster, mass casualty, and other emergency situations (EVII #9)
 - a. Discuss the emergency response and management plans for the local community and the role(s) of the nurse
 - b. Explain the health, healthcare, and emergency preparedness needs of a defined population (EVII #8)
 - c. Identify personal, professional, and environmental risks that impact personal and professional choices and behaviors (E VIII #7)
-

These SLOs are not approved for experiential credit.

Effective: Fall 2017
