

BAKER COLLEGE

STUDENT LEARNING OUTCOMES

NUR4750 Pathophysiology
3 Semester Hours

Student Learning Outcomes and Enabling Objectives

1. Apply the sciences of pathophysiology to selected systems and system disorders across the lifespan
 - a. Reinforce knowledge of the pathophysiological process of the human body
 - b. Describe the normal structure and function of cell, tissue, organ, and body system
 2. Reinforce knowledge of pathophysiology to selected system disorders across the lifespan
 - a. Explain operative compensatory mechanisms in selected disorders
 3. Investigate issues involved in prevention, diagnosis, and treatment of selected disorders
 - a. Discuss ethical issues involved in prevention, diagnosis, and treatment of selected disorders.
 4. Discuss the interactions between genetic and environment factors in the development of a selected disorder.
-

Big Ideas

- Pathophysiology
- Disease Process
- Ethical/Legal Principles
- Genetic & Environmental Factors

Essential Questions

1. How does an understanding of the pathophysiological process contribute to sound nursing practice?
 2. What are the legal and ethical considerations in the care of ill patients?
 3. Does a strong knowledge of pathophysiology of the human body assist with prevention, diagnosis and treatment of selected disorders?
 4. Is there an interaction between genetics and the environment in the development and progression of selected disorders?
-

These SLOs are not approved for experiential credit.

Effective: Spring 2017
