

# INSC313: Global Security and Intelligence

## College of Graduate and Continuing Studies, Norwich University

[Print This Page](#)

### Course Description

#### **INSC313 – Global Security and Intelligence - 3 credits**

This course examines a range of contemporary international issues – from questions of realism versus idealism in foreign affairs to changes in the nation-state, the rise and influence of member states in the Pacific Rim, and overall global security objectives. It will explore the uses of strategic intelligence by world leaders in shaping policy and the effects of strategic intelligence on world events. Students will be required to closely follow international developments and learn how to discuss them objectively and analytically. Areas of emphasis include science, technology, and globalization as the environment in which concepts of international security evolve and change over time. Pre-requisites: none.

### Course Outcomes

- Identify key outcomes of the Cold War initiative
- Evaluate the effectiveness of key strategies both during and following the Cold War
- Describe basic tenants of the US Intelligence Policy post 9/11
- Identify and analyze the effectiveness of technology on the US Global Intelligence efforts both pre and post 9/11

### Weekly Outline

Every week has a prescribed checklist of activities required to successfully complete the lesson. Follow this checklist, in the specified order, to complete each lesson.

Week	Topic	Assignments
Week 01	Intro to Global Security	1 Discussion
Week 02	Soviet Espionage	1 Discussion, 1 Assignment
Week 03	The CIA	1 Discussion
Week 04	Technology is our friend?	1 Discussion, 1 Assignment
Week 05	Spies and the Church	1 Discussion,
Week 06	Nightmares and Dreamscapes	1 Discussion, Draft of Final Paper
Week 07	Strategy	1 Discussion
Week 08	Wrap Up	1 Discussion, Final Paper

### Required Textbooks

The following textbooks are required for this course:

- *Strategic Intelligence in the Cold War and Beyond* by Jefferson Adams Routledge (2014). Print ISBN: 9780415782074 Digital ISBN: 9781317637684
- *The Craft of Intelligence* by Allen W. Dulles Lyons Press (2006). Print ISBN: 9781493018796
- *Theories of International Politics and Zombies* by Daniel W. Drezner Princeton University Press (2014). Print ISBN: 9780691163703 Digital ISBN: 9781400852284

See **Required Reading** list for additional seminar readings.

## Course Components

**POLICIES: The following policies apply to this seminar:**

### *Critical Thinking*

Although critical thinking is not always identified as an assignment requirement or as a key element in classroom discussion, you can use this skill every time you complete an assignment and speak with your classmates. It is important to think critically because, when you do, you reason through concepts rather than make automatic or emotionally based conclusions. Having an opinion is important, and you do not want to disregard your feelings on any given subject. In fact, you should support your feelings with evidence and ensure your feelings are relevant to the issue at hand. Consider an idea from all angles to understand both your own perspective and the perspectives of others.

I like to see more critical thinking in your own words in an assignment. It is good to use quotes but they should not be ***more than 20 percent of the paper***. Using mostly quotes and block quotes for the majority of your paper is not critical thinking. Of course, I will be looking for proper in-text citations in APA style for quotes and block quotes.

What is research? Research is scientifically conducted study of an issue with mathematical precision, or specific description of a phenomenon such as an unstudied cultural issue. When we research something there are often numbers involved or percentages. Sometimes, and sometimes not, there are control groups where one group receives an intervention or a medication and one group does not. That way we can "control" the variables such as people getting better because of a placebo effect.

Why do we look for scholarly, peer-reviewed, articles? The articles that are chosen for scientific journals are well reviewed by other scholars to see if the research plan was viable, if the population is the correct size, and if the methods and statistical analyses were correctly chosen. Be very cautious of your references. Online research is tricky. Sites like Wikipedia and Answers.com, etc are not peer reviewed and should not be used as your only source.

The results then, are as close as we can get to "truth." While we can never say that research creates facts or that research proves anything, we can say that the research supports a certain trend or result. When research from several different sources supports the same result, we can begin to add this up to a verifiable conclusion.

This process relies on trust among professionals that we agree on ethical and professional conduct. We also look at issues such as who has financially supported a study. By the way, we also cannot, as scholars say that something caused or did not cause something. The language is more tentative and sounds something like: "There is a possible causal relationship between X and Y."

Now that you are becoming a scholar, you will have to stop saying things like: "Everyone knows that...." and "Research proves that..." You will need to start using correct language. When you say research, I need to see what research you are discussing, about whose research, and when was it conducted?

This is where citation and referencing come in.

When addressing problems or assignments, try using the following critical thinking techniques:

- Consider the purpose or goal of an assignment.
- Restate a question in numerous ways.
- Gather information.
- Look for inferences and assumptions inherent in a problem or assignment.
- Clarify the thought process you use to understand a problem or assignment.
- Try to understand other points of view.
- Think through the implications and possibilities of your solution or idea.

In general, follow these guidelines for demonstrating your thinking process:

- Be clear. State what you mean and provide various explanations and examples.
- Be accurate. Justify or explain how you know your claims are true. If you are uncertain about the truth of your claims, how could you ascertain their truth?
- Be relevant. Explain how your ideas relate to the topic at hand.
- Be logical. Explain how ideas fit together and why they make sense. Describe how you came to your conclusions.
- Be fair. Consider how your ideas and behaviors will make others feel or think. Treat yourself, your classmates, and your facilitators with respect.

If there are any questions about this, please let me know.

### Quizzes and Exams

This course may have Quizzes and/or Exams. The exams are not timed.

### Grades

You will be provided a weekly commentary/lecture and have [required readings](#) and discussion assignments. There will be a number of written assignments and exercises, which are explained thoroughly in the list of assignments. A total of 1000 points are available in the course distributed across the components listed below, with both points and percent of final grade indicated.

As a student in this course, you have a number of responsibilities that will affect the level of learning you achieve. These responsibilities include: 1) working actively to create a challenging and useful learning experience for yourself, your discussion group and the class as a whole; 2) encouraging and supporting the learning of each member of the class; 3) preparing and participating fully in discussions as well as group and/or class activities; and 4) completing all assigned work on time or making prior arrangements if an absence of late submission is unavailable. In this course you have the opportunity to acquire knowledge and skills that will help you become effective, confident and focused in your learning.

Activities	Total Points	Weights (%)
Weekly Discussions – (50 points x 8 wks)	400	40%
1st Written Assignment (1250 – 1500 words)	100	10%
2nd Written Assignment (500 – 1000 words)	100	10%
Draft of Final Paper	150	15%
Final Paper (1500 – 2000 words)	250	25%

Letter grades for the course will be based on the following grading scale.

Letter Grade	Percentage	Grade Point
A	93–100%	4.0
A -	90-92.9%	3.7
B +	87-89.9%	3.3
B	83-86.9%	3.0
B -	80-82.9%	2.7
C +	77-79.9%	2.3
C	75-76.9%	2.0
C -	73-74.9%	1.7
D +	70-72.9%	1.3
D	67-69.9%	1.0
D -	63-66.9%	0.7
F	Below 63.0%	0.0

For complete information on the Grading Policy, please refer to the [CGCS Online Catalog](#).

All writing for this seminar must follow the APA writing style. All writing for this seminar must follow APA guidelines for formatting and citation, which can be found at [The Purdue Online Writing Lab \(OWL\)](#). Grading rubrics for assignments and discussions are provided from the [Grading Guidelines and Rubrics](#) link.

### Assignments

All writing for this seminar must follow the APA style. The [Purdue Online Writing Lab](#) is an excellent resource to answer any questions that might arise while you are working on a paper.

### Discussion Groups

This course will require active participation in weekly discussions. Each week will feature a specific topic for discussion. There will be a total of eight discussion board assignments with each being worth 50 points for a possible total of 400 points counting toward your final grade in this course. Discussions require a minimum of three posts in order to be eligible for full credit. Your first post in response to the discussion question should be substantive (approximately 300 words). It should answer the question utilizing reference to assigned readings, experience, and external research as appropriate. Following posts will be in response to posts of your fellow classmates or instructor. Response posts need to be substantive, yet concise. Challenge positions, ask questions, point out other viewpoints or thoughts, add information, refer to current events, etc. Being open to other perspectives and respect for diverse opinions is also important. On some weeks, the class may be divided and you may be asked to present a specific perspective or argument on the weekly discussion question.

### **Rules for Discussions**

All discussion postings in this class are to be considered confidential.

Each week's discussion question will be graded based on participation between **Monday at 12:05 AM** local time and **Saturday at 11:55 PM** local time.

Your first response to the weekly discussion question has to be posted by **Wednesday noon (12:00 PM) local time**. Note: The earlier you make your posts, the more time your classmates and you will have to work with.

Please refer to the [Grading Guidelines and Rubrics](#) for **Rules** and **Grading on Discussions**.

### **Late Work**

It is important that writing assignments and discussion posts be completed on time. Extensions of deadlines will be given only for serious extenuating circumstances. In the absence of such extensions, assignments may be downgraded for lateness at the discretion of the instructor. Regardless, it is imperative that you complete all assignments. Remember, your final paper is worth a significant portion of your final grade, is cumulative and requires a strong grasp of each of our topics!

### **Academic Honesty and the Norwich University Honor Code**

A student must submit work that represents the student's own original analysis and writing. Copying another's work is not appropriate. If the student relies on the research or writing of others, the student must cite those sources. Words or ideas that require citations include, but are not limited to all hardcopy or electronic publications, whether copyrighted or not, and all verbal or visual communication when the content of such communication clearly originates from an identifiable source. While students are encouraged to seek editing feedback, extensive revisions of one's work by another person is considered a lack of academic honesty, as it is representing another student's work as one's own.
